DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5 and 9-13, drawn to methods for making internal combustion engine parts, classified in class 164, subclass 57.1.
 - II. Claims 6-8, drawn to an internal combustion engine part, classified in class 123, subclass 195R.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the internal combustion engine part of Invention II can be made by a process materially different than that of Invention I. For example, the engine part of Invention II can be made by machining a larger block of metal comprised of a desired alloy composition.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
